SUMMARY

Full Stack Developer with expertise in building scalable web applications using React.js, Node.js, Express, and MongoDB. Proficient in developing end-to-end solutions featuring user authentication, RESTful APIs, and payment integrations. Quick learner with strong problem-solving abilities and a passion for creating efficient, user-centric applications.

EDUCATION

Bachelor of Engineering in Computer Engineering

Pursuing

Gujarat Technological University

TECHNICAL SKILLS

- **Frontend Technologies:** HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js, MongoDB, Postman
- **Database Systems:** MongoDB, Mongoose ODM
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel, Postman, npm
- **Core Competencies:** Quick Learning, Problem-Solving, Debugging, Code Optimization

PROJECTS

E-Commerce Application Development — [Link](#)

Full Stack Developer

Project Status: Backend development completed with secure authentication and RESTful APIs. Frontend interface and payment gateway integration currently in progress.

Tech Stack: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce application using React.js, Node.js, Express, and MongoDB, implementing secure user authentication and authorization with JWT.
- Architected and deployed RESTful APIs to handle product catalog management, shopping cart operations, and order processing, optimizing database queries to reduce API response time.
- Integrated payment gateway workflows to enable secure online transactions, ensuring PCI compliance and implementing error handling for transaction failures.
- Designed responsive user interfaces using React.js and Tailwind CSS, creating reusable component libraries for consistent design patterns across the application.
- Implemented state management solutions and React Hooks for efficient component lifecycle management, improving application scalability and maintainability.

React CRUD Application — [Link](#)

Frontend Developer

Tech Stack: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

- Built a dynamic task management application using React.js and Tailwind CSS, implementing full CRUD operations for efficient task handling and real-time data manipulation.
- Developed an intuitive user interface with task creation, editing, deletion, and updating functionality, along with advanced search capabilities to filter tasks based on keywords and criteria.
- Implemented a task status tracking system to categorize tasks as completed or pending, providing clear visibility of progress and improving workflow management.

Sticky Notes — [Link](#)

Frontend Developer

Tech Stack: HTML5, CSS3, JavaScript

- Developed a responsive web application using HTML, CSS, and JavaScript with full CRUD operations (Create, Read, Update, Delete) for efficient note management.
- Added dark/light mode toggle and built real-time search functionality for quick note retrieval and improved user experience.
- Integrated sorting feature (newest/oldest) for better organization and designed a clean, intuitive UI for efficient note handling.
